

OPATCH ROLLBACK

1. Check the existence of patch in oracle home inventory.

```
$ORACLE_HOME/OPatch/opatch lsinventory | grep 35042068
```

Patch 27105253 : applied on Thu Apr 05 10:04:50 AST 2018

Patch description: "Database Release Update : 12.2.0.1.180116 (35042068)"

2. Shutdown services running from oracle_home(database , listener)

shutdown immediate;

```
lsnrctl stop LISTENER_TEST
```

3. Rollback the patch.

```
$ORACLE_HOME/OPatch/opatch rollback -id 35042068
```

4. Now start the database:

```
startup
```

```
lsnrctl start LISTENER_TEST
```

5. Now run the post rollback script.

```
cd $ORACLE_HOME/OPatch
```

```
./datapatch -verbose
```

6. Check the registry table for the status:

```
SQL> select patch_id,status,action,description from dba_registry_sqlpatch;
```
